

Sand Coulee Acid Mine Drainage Source Control Project, Cascade County

**Abandoned Mine Lands**

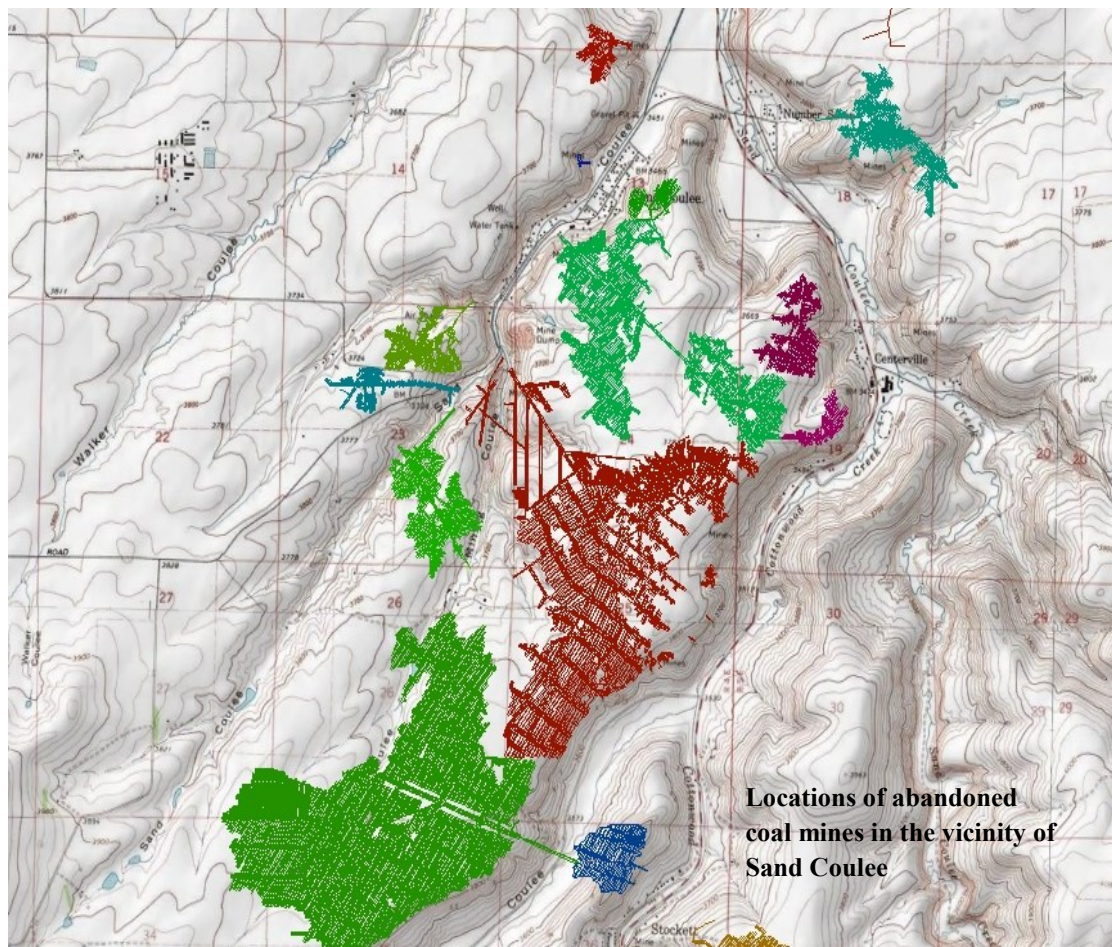

**August 2016**

## MONTANA DEQ IS SEEKING COMMENTS ON THE SAND COULEE SOURCE CONTROL PROJECT

DEQ Abandoned Mine Lands Program proposes to drill horizontal and vertical wells up gradient of the abandoned coal mines in Sand Coulee to dewater the mine workings to reduce the formation of acid mine drainage (Rusty Ditch) throughout the community.

The Environmental Assessment is available online <http://deq.mt.gov/Land/AbandonedMines/CurrentProjects>

Comments will be accepted August 2–September 3, 2016.
